WOODEN DRAWERS

WOODEN DRAWERS. ONE WAY OR ANOTHER.

Whether drawers from veneered decorative chipboards or from hardwood - TS guarantees optimal quality in each desired area of application.

- TS hardwood drawers made from 7-ply adhesive bonding beech plywood are designed for highest demands and particularly long life-span.
- TS veneered wooden drawers with decorative face veneer offer versatile employment and a special long life-span with an attractive price/achievement relationship. Same applies naturally to the drawer bottoms made from plywood or veneered Neocor boards.

Beyond the common usual standard thickness we can produce at any time on demand special designs both for small series and in large number of items with continuous quality.
